## (Civilian Lifesaver And Survival Program)

### ***EDUCATORS TO LIFESAVERS VERSION***

A teacher's actions can and often do create a lifelong impact on a student's life. Confucius once said *"Education breeds confidence. Confidence breeds hope. Hope breeds peace."*

It's no secret that violent attacks in our schools have become an unfortunate norm in our society today and we must take action to get back to peace. Effective action requires changes in our behaviors and responses to life-threatening events we suddenly find ourselves in thru no fault of our own. We all want to hope for the best, but hope alone is simply not an effective strategy for survival. Sometimes these changes are difficult and scary and may not exactly line up with what one feels they are capable of in the time of stress where lives depend on you. This doesn't make the needed changes any less critical. Often this fear is from not exactly knowing what to do when the peanut butter hits the fan. Silverback Safety & Training Solutions instructors will help you with that part.

Choosing not to act and adjusting behaviors while utilizing a willful blindness in hopes that an attack "won't happen here" has been a shared response after acts of senseless violence.

*"We are all born ignorant, but one must work hard to remain stupid."*- Benjamin Franklin

Educators are some of the best people who walk the planet with a true desire to help the upcoming generations make the world a little better by teaching them how. From teachers and teachers' aides, administration, cafeteria workers, and bus drivers. It's thru your efforts that students become better human beings, young adults capable of contributing to society and leading happy and successful lives.

It's your job to be the best educator you can be. It's our job at Silverback STS to teach you how to become Lifesavers. We teach you how to protect your students and how to treat those injured in an attack. We are proud to stand beside you as we act to change mindsets and escape the victim mentality. We move from a victim mentality to a survivor mentality thru knowledge and hands-on application of this knowledge.

Thru our **EDUCATOR TO LIFESAVERS COURSE**, you will walk away with a newfound skillset that will help you keep your students safer and you will have the ability to save lives when that day comes for you and yours.

This course will cover the basics of immediate response to an active threat, treatment of life-threatening wounds from an attack, review of rally and reunification protocols, the establishment of casualty collection points, student accountability, Communications, Unified Command with Law and FD/EMS, how to communicate and what to expect with incoming Law Enforcement and FD/EMS agencies.

This course has been delivered to thousands over the years by subject matter experts from Silverback STS, most of whom are veterans, who currently function as FBI, SWAT Operators and Medics, TEMS Physicians and Nurses, and TECC trained Law Enforcement and Firefighters and EMS. For the mental aspect and stress-related in these situations, we have our own Ft. Hood massacre survivor who is a practicing psychologist and current SWAT team member in Ohio. She has much to offer in this arena. Our operators who teach you the skill sets will be by your side, step by step ensuring you walk away with the capability of saving lives should that day come for you and those you protect.

**The *C.L.A.S.P. Educators to Lifesavers* meets and exceeds the medical requirements in the Ohio ASSET Training Program.**

Contact us for further information and to schedule your one-day course today!

Warm regards,

Troy
