SILVERBACK INTEGRATED SURVIVAL MODEL

BARRACUDA INTRUDER DEFENSE SYSTEM

A fast, simple secondary layer of door security that helps delay unauthorized entry and buys occupants time.

Available for inward-swinging doors, outward-swinging doors and scissor-action door closers.

PROTECTOR II IFAK

A street-ready individual trauma kit built for law enforcement, armed security and public-safety professionals.

Compact, accessible and equipped to support immediate treatment of life-threatening injuries when seconds matter.

BITT KITS

Multi-casualty trauma kits designed for people with little or no medical training.

Built for schools, workplaces, houses of worship and other organizations preparing everyday people to provide immediate treatment for life-threatening bleeding.

PHYSICAL THREAT ASSESSMENTS

Physical threat assessments tailored to your facility, mission, personnel and specific risks. We identify vulnerabilities and provide practical, prioritized recommendations to strengthen security, planning and response.

CUSTOMIZED TRAINING

We can combine training programs to meet the needs of different personnel within the same facility, including armed security and general staff.

Each group receives role-appropriate training while preparing to work together during an emergency.

INSTRUCTORS / SUBJECT MATTER EXPERTS

Our instructors bring real-world experience from law enforcement, Fire/EMS, military service, emergency management and tactical medicine.

Review the backgrounds, credentials and operational experience of the professionals entrusted with training your people.

Our team's real-world experience translates into practical instruction, sound decision-making, and coordinated response under pressure.
